

Mateusz Kubaszek

AI Architect & Consultant | Technical Leader

m.kubaszek@protonmail.com

Opole, Poland

github.com/mkubasz

linkedin.com/in/mateusz-kubaszek

AI-focused software architect with **14+ years of experience** and a track record of taking AI initiatives from business problem to production. Designs LLM-powered applications, AI agent workflows, ML platforms, and the cloud and data foundations behind them.

Applied AI

LLMs, agents, vector search

AI Delivery

LLMOps, observability, MLOps

Foundations

AWS, GCP, data platforms

Core expertise

AI, LLMs & Machine Learning

OpenAI, Hugging Face, LangChain, LlamaIndex, AI agents, vector search, Qdrant, LLMOps, agent observability, MLOps

AI & Software Architecture

Production AI systems, distributed systems, microservices, event-driven architecture,DDD, CQRS, event sourcing

Data & AI Platforms

Spark, Flink, Airflow, dbt, Elasticsearch, ClickHouse, AWS, GCP, Kubernetes, Terraform, GitOps, FinOps

Hands-on Engineering

Python, Rust, TypeScript/JavaScript, Go, FastAPI, Node.js, TensorFlow, PyTorch, React, Next.js

Professional experience

SELECTED ROLES

Data Engineer / AI Engineer

[HealthJoy](#)

Sep 2025 - Present

- Build real-time communication systems supporting responsive, user-facing healthcare experiences.
- Train and adapt small language models while building LLMOps workflows for evaluation, deployment, and monitoring.
- Develop observable agentic systems for integrations and conversational user chat, applying FinOps to control cloud and AI inference costs.

Consultant Software Architect

[Order of Devs](#)

Sep 2018 - Present

- Advise startups and enterprises on AI strategy, production AI architecture, cloud, and data platforms.
- Facilitated Event Storming workshops and translated business needs into technical roadmaps.
- Led a Canal+ cloud migration using AWS, Spark, and Snowflake.
- Designed a computer-vision platform for vehicle detection and led development of the open-source DuckRS ML library in Rust.

Senior Software Engineer / AI Consultant

[Heliux](#)

Sep 2023 - Aug 2025

- Design and deliver LLM-powered solutions and AI agent workflows for supply-chain and product-management use cases.
- Integrate foundation models, vector search, and custom business systems into two key product modules.
- Own AI solution architecture, AWS infrastructure, CI/CD, and hands-on Python, Rust, and Node.js delivery.

Professional experience

CONTINUED

Senior Software Engineer

Laminar

Sep 2022 - Oct 2023

- Built a video-streaming platform and its content-management and orchestration systems.
- Led architecture planning, AWS infrastructure, CI/CD, and architecture workshops.
- Worked across Node.js, Python, Spark, dbt, Akamai, Terraform, AWS, GCP, and Kubernetes.

Senior Software Engineer / Technical Lead

MasterBorn

Jan 2020 - Mar 2022

- Led delivery of an AWS serverless NLP platform for classifying, archiving, and searching political documents.
- Architected APIs, scraping systems, and serverless products for US transport, travel, and FinTech clients.
- Combined hands-on Python and TypeScript development with architecture and team leadership.

Senior Software Engineer

Nozbe

Jul 2019 - Jan 2020

- Enhanced a team-productivity platform and built ML infrastructure for productivity features.
- Worked on Kubernetes, AWS, Python, TensorFlow, Flutter, and Node.js systems.

Senior Software Engineer

Bright Coders Factory

Sep 2018 - Jul 2019

- Architected an MVP for Roche and platforms for Spanish and Norwegian FinTech clients.
- Delivered systems using .NET Core, AWS, Azure, Kubernetes, Kotlin, Python, and Node.js.

Lead Software Engineer

Data Lions

Jan 2018 - Nov 2018

- Planned and implemented architecture for a disease-detection platform.
- Optimized computer-vision models for disease detection and supported a mobile data-visualization application.

Software Engineer

Nokia

Mar 2017 - Jan 2018

- Implemented routing-system architecture for 5G technology and built a network test platform.
- Served as Scrum Master alongside Python and C++ engineering responsibilities.

Independent Software Engineer

Multiple clients

Mar 2012 - Mar 2017

- Delivered ERP, mobile, web, and backend systems for clients including Techland, Future Processing, Weegree, and the University of Opole.
- Contributed fixes and improvements to GCC, Jenkins, React, and Android Studio.

Selected project themes

Enterprise AI

LLM applications, AI agents, vector search

Production ML

MLOps, NLP, computer vision, deployment

AI foundations

Cloud, data platforms, IaC, CI/CD

Education

OPOLE, POLAND

Master of Engineering

2017 - 2019

[Opole University of Technology](#)

Thesis: Comparative analysis of selected Data Science algorithms implemented in Rust and Python

Bachelor of Engineering

2013 - 2017

[University of Opole](#)

Thesis: Distributed system based on blockchain

Speaking & community

Architecture IT Conference

"AI in Architecture", 2023

Data Science Summer Conference

Creator and speaker, 2021

Data Science Charity Conference

Creator and speaker, 2020

Technical YouTube channel

Architecture, programming, and ML

Additional details

Polish

Native

English

B2+ | Professional working proficiency

AMPPZZ

National Collegiate Programming Contest, 2014-2016

Availability

Remote and on-site engagements

AI LEADERSHIP

From AI strategy to production.

I connect business goals with pragmatic AI architecture and hands-on engineering - helping teams choose the right use cases, reduce delivery risk, and build AI systems that create measurable value.
